Now breaks bold Boreas *from his hollow Caves,*
The Brooks and Rivers deck'd with silver waves:
The bald pate Woods are periwigg'd with wool,
Which Nature from the hide bound Clouds does pull.

An

An Astrologo-Physicial Discourse.

THat the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humours, is caused by the various and different Aspects and Positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick;

Let the { Sanguine / Cholerick / Phlegmatick / Melancholly } bleed the ☽ being in { ♓, ♉ or ♊. / ♋, ♌ or ♓. / ♐, ♑ or ♏. / ♎, ♒, or ♓. }

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Electuaries, when the ☽ is in ♋; with Pills, when she is in ♓; with Potions, when in ♍, because then posited as before directed.

Vomits are unsafe for all sorts of complections and constitutions; yet sometimes there is a necessity for them; as when the Distemper lyeth above the Stomach; it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☽ is in ♉, ♍, or ♐ in any good Aspect of ♀, ☿, or ☉.

Glysters are most conveniently administred, when the ☽ is in ♈, ♎, or ♑, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the ☽ is in any of the Earthly Signs, viz. ♉, ♍, or ♑; of which experience is a valuable witness.

Very proper to Bath, when the ☽ is in ♋, ♎, ♏, or ♓, in Aspect of ♀, or ♃.

Convenient to cut Hair, the ☽ being in ♎, ♐, ♏, or ♓, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

TRIGGE. 1698.

Sundry Excellent Astrological Rules to be Observed in Agriculture, Husbandry, &c. according to *Claudius Dariot*, and other Learned Astrologers, Physicians and Philosophers.

IT is not unknown (but by daily Experience demonstrated) to those of Cains Profession, (viz. Tillers of the Ground) that all Plants, Seeds, and other things, which are produced out of the Bowels of the Earth, (having her for their common Parent, as it were) do receive both Increase and Decrease by the motion and position of the Moon, and therefore it is, that the careful Husbandman in sowing Seeds, planting Trees, grafting Scions, pruning Vines, gathering Fruit, felling Timber, dunging Land, and in all other necessary Appendixes to Agriculture, that he may the better reap the Fruits of his Labour and Toyl, should be acquainted with the Influences of the Moon and Stars, as the Noble Virgil approves of in his Georgicks. And that his expectation may be the better answered, he ought in the first place to have a special regard to the state and condition of Saturn, that he be not impedited or afflicted in the beginning of any Rural Affairs, for that he is the Ruler of Husbandry, and hath Dominion over all Terrene Commodities. Let him therefore (if you can so order it) be in good Aspect of Jupiter or Venus well affected, not Peregrine, Retrograde, or Combust, but rather in some of his own Dignities, in good Configuration of the Moon, free from the beams of Mars, who, in this Case ought to be weak, Cadent, Peregrine, Combust, void of all Dignity, as well Essential as Accidental.

Let all manner of Grain or Corn be sowed when the Moon increases, in Signs movable, as Aries, Cancer, Libra, Capricorn, or if she chance to be in Taurus, Virgo, Sagittarius, Pisces, let her be in Sextile or Trine of Saturn; if your Land be moist, or the Seed of a moist nature that is sowen, then let the Moon be decreasing in Virgo, Capricorn or Aries. —If your Ground be dry, and the Seed of a like condition, let the Moon be increasing in Cancer or Pisces, in good aspect to Saturn, who, together with the Moon should be in good Configuration of Jupiter or Venus: —But if your Land which

is to be sowen be of a middle constitution or condition, viz. between dry and moist, it is then good to sow it, when the Moon *is in* Libra *well befriended.*

What you intend to plant, let the Moon *be in* Conjunction, Sextile *or* Trine *of* Saturn, *free from the body or ill beams of* Mars *in a fixed sign, as* Taurus, Leo, Scorpio *or* Aquarius, *and let it be in some aspect of* Jupiter *and* Leo, *if possible.*

In planting Trees or Vines, let the Ascendant be Fixed, and the Moon *placed in an Earthy sign, as* Taurus, Virgo *or* Capricorn, *in good aspect of* Saturn.

Graft or prune Trees the Moon *decreasing in* Aquarius *chiefly, and in aspect of* Jupiter *or* Venus.

Fell Timber for Architecture from November *the* 22. *to* January 22, *the* Moon *decreasing in* Taurus, Virgo *or* Capricorn, *and in them bein good aspect of* Saturn.

Plash Hedges, fell Wood for Fewel, that the Stocks may the better grow again, the Moon *increasing in* Aries *or* Libra, *chiefly in the first quarter,* Jupiter *or* Venus *assisting.*

Cut Vines in December, January *or* February, *the* Moon *in* Aries, Taurus *or* Libra: —*Remove Trees when the* Moon *in the same Signs, all the last quarter in* November, December *or* February, *dung Land to prevent Weeds.*

Good to till Gardens, to sow and set Plants and Herbs, to set Hop-Poles and make a Hop-yard, the Moon *in* Libra *or* Aquarius.

Gather Apples, and other Fruits, Herbs and Flowers to have them large and fair, the Moon *increasing towards the Full, to keep and preserve them in store, gather them dry the* Moon *decreasing in aspect of* Jupiter *or* Venus.

Shear Sheep, cut Grass for Hay, the Moon *increasing for it will spring again the sooner.*

Kill fat Swine near the Full, the Fat will endure boyling the better, and waste less than if killed at other times.

Geld Cattle, Knit Lambs, the Moon *decreasing, free from the Beams of* Saturn *or* Mars, *and in some aspect of* Jupiter *or* Venus.

Set Beans or Pease in the New Moon, *and they will ever be Blooming, and so run all up into Stalks: This is affirmed by the excellent Philosopher Sir* Ch. Heydon, *in his admirable* Defence of Astrology.

of

Of the Eclipses which will happen in 1698.

This Year of 1698. will afford two Solar Eclipses: The one of them happens before the Suns Apogæon, and the other after it. So that there can be no Full-Moon Eclipse in this Year.

1. The first Solar *Deliquium* will be celebrated on the 31th day of *March*, in 21 degrees of *Aries*, after Sun set; and therefore not to be seen in these Islands. But, it will prove a great Eclipse in it self, as happening just with the South Node. It will be of famous portent also; the Sun being darkened so near the very point wherein he is said to receive the Dignity of Exaltation; and in the Terms of *Mercury*, and decanate of *Venus*. Both which Planets are in *Aries* also at the time of this Eclipse. And if Subterranean Eclipses signifie any thing to those places where they are not visible, this cannot but intend much good to *England*, four Planets being in *Aries*, the Horoscope thereof. *Mercury* is the Patron of Policy, Council, Ingenuity, *&c.* and *Venus* is the Governess of Pleasures, Felicity, Delight. Let such effects be our portion, and welcome: but, I fear, our Peccancies are too many and large to expect such Blessings. We have sin'd against Heaven and against Men, against Monarchs and Magistrates, against Church and State; and nothing but the meer Mercy of a greatly provoked God can obviate our Crimes.

The Decanate, wherein this Eclipse happens, gives us a glimmering hopes of Good, it being govern'd by the gentle Planet *Venus*. Authors say, it is a Decanate of Subtilty in all things; and of Humility, Play, Beauty and Mirth; and seems to be compounded of the Wisdom of the Serpent, and the Innocency of the Dove. And such a Constitution of the publick body, as well as of each private person, may indeed entitle us to the Blessings and Pleasures hereby promised.

2. The second Solar *Deliquium* of this Year will happen on *September* the 24th day, about our 4 in the Morning, in 11 degrees of *Libra*, and in the Terms of *Venus*, and Decanate of *Saturn*: This also will be a great defect, it happening in the very degree of the *North-Node*, or *Dragons-Head*. The Decanate Eclipsed is govern'd by *Saturn*, and imports Rest, Plenty, a quiet, good, and secure Life: And, to render it the more com-

comfortable, *Venus* is Ruler of the Term, and *Saturn* is powerful, and in Trine of both the Luminaries. A dignified *Saturn* may produce as great Good as any other Planet whatever; He is the great Wheel of the Celestial Clock-work, the highest of all the seven Erraticals; and in a Natural way, under God, is the Author of all durable Good. No stately Edifice, no long-liv'd Family or Government, without a touch, or tincture of *Saturn*. And, if I am not deceived with a false Idea, in the room of Truth, I cannot but hope Years of Peace and plenty are approaching unto many lately afflicted Nations. If we should enquire, How? or by what means? Methinks 'tis readily and plainly Answer'd, by *Venus* her being in Conjunction with the Luminaries in the former Eclipse; and by her governing them in this latter; at which time she is in Conjunction of *Jupiter*. Fortunate Marriages, and successful Treaties, and Faithful Embassies, and the like, will procure the long expected and lasting Repose of *Europe*. Which God grant. Thus much shall serve for the Eclipses.

Of the Annual Seasons of the Year, their Natures, Qualities, and Descriptions.

I. *Of the Spring.*

THE *Spring*, the most delightful Season of the Year, begins when the *Sun* enters into *Aries*, the first and chief Sign of the *Zodiack*, which this Year happens on *March* the 9th day, 11 h. 41'. *P M.* in *London*. The beginning of *Sagittary* ascends on the East Angle. This Season continueth all that time the *Sun* is passing the three first Northern Signs, *viz. Aries*, *Taurus*, and *Gemini*.

At the beginning of this Season the *Sun* makes Dayes and Nights equal all the World over: And, as having left the Inhabitants of the Southern Hemisphere, doth refresh and revive the Spirits of all those that dwell on the Northern parts of this Earthy Globe.

The Astronomical Rulers of this Quarter, are *Mars*, *Venus*, and *Mercury*; which Planets Naturally import Vigour, Delight, and Mutability: And, accordingly, when the *Sun* is in *Aries*, all

all Vegetables put forth their Leaves and Bloſſoms, and Nature expreſſes a Spring-like force in all things.

While the *Sun* continues in *Taurus*, (the Dignities of *Venus*) the Leaves and Flowers of the *Spring* expand and ſhew themſelves after a delightful manner; and Dame *Veſta* ſets open her Rich Treaſure and Paradiſe of Pleaſures, to all her Sons and Daughters, to exerciſe and delight their Souls and Senſes.

All the time the *Sun* tranſiteth *Gemini*, (the Dignities of *Mercury*) Natures Limners are notably employ'd: and out of *Mars* his vigour, and the delights of *Venus*, do paint out a million of pleaſing Varieties to the World.

But now, as if God and Nature never intended that Mankind ſhould be glutted with beholding of One Object continually, this Glorious and Amiable Seaſon, the Youthful *Spring*, with all its verdant varieties leaves us. And, ſo we approach——

II. *The Summer Seaſon.*

THE *Summer* Seaſon begins where the *Spring* ends. And the *Sun* mounting his *Apogæon* Chair of Honour, is removed to his greateſt diſtance from the Earth, making the largeſt quantity of Sun ſhine, and leaſt portion of Shadow; or (which is all one) longeſt Days and ſhorteſt Nights to us. This Seaſon now commenceth on *June* the 10th day, 13 h. 58'. *P. M.* and continueth all the time the *Sun* makes his progreſs thorow the three laſt Northern Signs, *viz. Cancer, Leo, Virgo.* And the grand Rulers of this comfortable Quarter are the *Moon, Sun* and *Mercury.*

The *Moon*, as ruling *Cancer*, here precedes the *Sun* in Dominion, and all the Births of the Spring are now ſwelled into a pleaſing Dropſie; and ſo continue for the firſt *Summer* month. Then, the *Sun*, as having greateſt power in *Leo*, aſſumes a particular, as well as general Sway or Government: And by his great Heat reduces all Vegetables from their Anaſarchal Swelling, into a poſitive Hectick Feaver; thereby ripening the Seeds of Flowers, Herbs, and Fruits. And this is the grand buſineſs of the ſecond *Summer* month.

After the *Sun* hath performed his excellent Office, *Mercury* enters upon his Regency, which is over the laſt month of this Quarter. And according to his double Dignity in *Virgo, viz.* of Houſe and Exaltation, (*Virgo* being a dry Sign) he exalts all things from their Hectical condition into a direct *Marasmos*:

And

And now every thing being fully Ripe, (as the Corn ready for the Sickle, and the Harvest mans Levelling-hand), and the Disease of this Quarter being become thus desperate, 'tis in vain to hope to restore its wasted Spirits by Cordials, Boluses, or any other means.

☞ Do you not see how orderly the Seasons of the Year are governed by the several Planets in their turns? And this too, according to their Natures, as *Astrologers* have justly distinguished of their Dignities.

Thus, having seen the Death of the *Spring* and *Summer* Seasons, the only pleasant and charming parts of the Year; Let us in the next place attend their Funerals. Which will be by considering——

III. *The Autumnal Quarter.*

THE *Autumnal* Quarter is the third Season of the Year; and the declining Equinox thereof. The Days and Nights are now again Equal all the World over; and the *Sun* doth Irradiate both the *Poles* equally, as at the beginning of the *Spring*. —*Autumn* begins where *Summer* ends; *viz.* At the Sun touching the first point of *Libra*. And this Year happens on *September* the 12th day, 5 h. 45'. *P. M. Sagittary* 27 degrees then culminating, and *Pisces* 22 degrees arising in the East. This Quarter continueth all the time the *Sun* passeth thorow the three first Southern Signs; *viz. Libra, Scorpio, Sagittary*. And the Planets governing those Signs, are *Venus, Mars* and *Jupiter*.

Kind *Venus*, as ruling *Libra*, bestows her Tears upon the Herse of the deceased *Summer*; and thereby generates a *Phœnix* out of the old ones Ashes. Whence in the first of these months we are made happy with a later Spring. But alas! not (if any long duration) but soon fading, like to all earthly Joyes and Pleasures.

Then *Mars*, as governing *Scorpio*, comes, and adds Heat and dryness to the moisture which *Venus* lent; thereby to cherish, invigorate and ripen the later Spring. But that also is not long durable, but soon returns, by reason of the *Suns* absence, who is the Fountain of Life and Heat, the grand Principle of Generation, and producer of all things.

Lastly, *Jupiter* takes his turn of Regiment, as being Lord of *Sagitary*; and by his Balsamick beams endeavours to perfect what *Mars* and *Venus* of themselves could not. And so conserves the Mummial vertue of all Plants, Herbs, Fruits, Flowers, &c.

&c. for the good of Humane kind, whereby the Species of all things are preserved: at least to the end of this declining Quarter, which is as far as his Gubernation extends. And so leaves us to consider of ——

IV. *The Brumal or Winter Quarter.*

WHich Initiates alwayes where *Autumn* concludes; *viz.* at the *Suns* saluting the first scruple of *Capricorn*; the Earth being then farthest deflected from the *Sun* perpendicular Rayes receiveth least portion of Sun-shine, and greatest quantity of Shadow; thereby making shortest Days and longest Nights to us on this side the Equator. The *Sun* is now in *Perigeo*, or nearest distance from the Earth; as being in opposition to his *Apogeon*; which is *Cancer*.

This dark and melancholly Quarter this Year beginneth *December* the 10th day, 17 h. 55'. *P. M.* or the 11th day, 3'. before 6 a Cock in the morning, (the Figure is nearly the same with that of the Spring) and it continueth all that time the *Sun* is transiting thorow the three last Southern Signs, *viz. Capricorn*, *Aquarius*, *Pisces*: And the chief Rulers of this Quarter are *Saturn* and *Jupiter*.

Saturn, you see, hath a double power to what *Jupiter* enjoyes; *Capricorn* and *Aquarius*, both being his *Domicilliums*, or Mansion-Houses. And *Jupiter* only governs the last Sign of this Quarter, *viz. Pisces*. Hence it is, —That all things look with a sad, wither'd and unpleasant Countenance, wearing the Image of Death and Destruction. Now, Frost, Snow, Hayles, Hail, thick Clouds, extremity of Cold, Barrenness, and all things that are negative to delight and pleasure, have their Regency.

Thus we find how all the Yearly Seasons are made, and how by struggling interests, maintain'd. And also, how at the last *Saturn* truly proves the devourer of his own Issue. And, how benign *Jupiter*, by his gentle moisture in *Pisces* puts us in hopes of an approaching Spring.

And thus, by this orderly Rule of the Planets through the several Seasons of the Year, are we put in mind of the several parts of our Lives agreeable thereunto; *viz.* How we pass the Spring of our Youth; the Summer of our Manhood; our Autumn of declining Years; and the Winter of our Old Age: —Where *Saturn* with his sharp Sickle stands ready to cut us down. And lastly, how by passing thorow this Vale of Misery,

ry,

ry, this Natural Death, we aſcend to the Government of the true *Jupiter*, *viz.* to Immortality and a bleſſed Life; where we ſhall be Companions for Angels, and behold the Face of God in Glory. —— But ——

Oh! who ſhall tell! who ſhall deſcribe thy Throne!
Thou Great THREE-ONE!
There, thou thy ſelf doſt in full preſence ſhow,
Not abſent from the meaner Worlds below:
No, if thou wer't, the Elements League would ceaſe,
And all thy Creatures break thy Natures Peace.
The Sun would ſtop his courſe, or gallop back;
The Stars drop out, the Poles themſelves would crack:
Earths ſtrong Foundations would be torn in twain,
And this vaſt work all ravel out again
To its firſt Nothing. —— Cowley Davideis, Lib. 1.

I will conclude this Year with telling you, That on *August* the 29th will be celebrated a Famous Conjunction of *Jupiter* and *Mars*, in 22 degrees of the Celeſtial Scorpion. It denotes Afflictions to the Northern parts of the World; chiefly, to Countries and places near the Sea. Occaſions, many times, great Naumachies, Inundations, Shipwracks, with divers various misfortunes. The Decanate of this Conjunction is governed by the *Sun*, and intimates Affronts, Detections, Miſchiefs and Quarrels among Men, and continueth Striſes already begun. So ſaith *Johannes Angelus*, He deſcribes this Face by —*A Man ſitting on a ſtool, and two Dogs by him, fighting.* The *Sun* that rules the place of this notable Conjunction ſignifies Monarchs and Monarchy, and ſeems ſomewhat unappeaſable until he hath conquer'd every oppoſite Intereſt, which hath long darken'd the Glory of Church and State. *Da pacem Domine in diebus noſtris.* Amen.

FINIS.

Advertiſement.
